PROFESSIONAL SUMMARY

B.Tech Computer Science student (expected 2027) specializing in Python software development, with hands-on experience building full-stack web applications in Django, designing RESTful APIs with CRUD operations and role-based access control, and working with relational databases through ORM. Proficient in object-oriented programming, data structures and algorithms, exception handling, and unit testing with pytest/unittest. Experienced in data analysis and visualization using Pandas, NumPy, and Matplotlib, with working knowledge of Git/GitHub version control and foundational machine learning concepts. Strong analytical and debugging skills, fast learner, and effective collaborator seeking a Python Developer Internship to contribute to API development, automation, and application development.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Python & Data: NumPy, Pandas, Matplotlib, exploratory data analysis, supervised & unsupervised learning fundamentals

Web Development: Django, REST API design & integration, Flask (fundamentals), React JS, HTML5, CSS3, Tailwind CSS

Databases: SQL, NoSQL concepts, ORM usage, relational database design, CRUD operations

Core CS: Object-oriented programming, data structures & algorithms, exception handling, debugging & troubleshooting

Testing & Tools: pytest, unittest, Git, GitHub, code documentation, code reviews

Other: Python scripting & automation, basic deployment/DevOps fundamentals, problem-solving, teamwork, communication

PROJECTS

Content Management System — Full-Stack Web Application

Django · Python · SQL · REST API

- Built a full-stack Content Management System in Django and Python with a relational SQL database for structured, persistent storage of users, content entries, and access roles.
- Designed and implemented RESTful API endpoints supporting full CRUD operations, cleanly separating backend logic from content delivery.
- Implemented authentication and role-based access control (RBAC) to restrict content creation, editing, and publishing permissions by user role.

AI Agency — Frontend Web Application

React JS · JavaScript · Tailwind CSS

- Building a modern, component-driven frontend application using React JS and Tailwind CSS with reusable, maintainable component architecture.
- Structured a utility-first styling system for consistent, responsive layouts across devices.

Password Validator — Python Application

Python · OOP · Input Validation

- Designed a logic-driven password validation tool in Python using multi-condition checks, iterative loops, and controlled retry mechanisms.
- Engineered a multi-attempt login flow with granular input validation and descriptive error handling, reflecting solid debugging practice.

Personal Portfolio Website

HTML5 · CSS3 · JavaScript

- Engineered a fully responsive personal portfolio with semantic, structured layouts optimized for cross-device compatibility.
- Applied CSS Flexbox and Grid for a clean, professional UI with fast load times.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering

Jan 2023 – Jan 2027

Babu Banarasi Das Northern India Institute of Technology, Lucknow | GPA: 7.35 / 10.0

Affiliated to Dr. A.P.J. Abdul Kalam Technical University (AKTU)

CERTIFICATIONS

- Cisco — Python Essentials 1
- IBM — Fundamentals of Artificial Intelligence
- Accenture — Developer and Technology Job Simulation
- Microsoft — Fabric Data Engineer (DP-700), Ignite & Fabric Data Days Skill Challenge
